

## **From Surgical Nurse to Civil Litigator**

Nurses are highly regarded and trusted for good reason. So nursing was an obvious choice when it came time to choose a career. For years I worked in the operating room as a registered nurse, helping patients endure some of the most stressful moments of their lives. These high-pressure situations made one thing abundantly clear: everyone deserves to be treated ethically and with the highest professional standards.

My wish is to bring the same qualities of trustworthiness and ethical standards over as a civil litigation attorney. Becoming a party to litigation, after all, can be just as emotionally taxing as being on the operating table. You have a lot at stake and it's an uncertain time, but with counsel that looks out for your best interests, I work hard to make a positive change. Ultimately, you can take comfort in knowing that you're being cared for and your matter is being positioned for an optimal outcome.

### **A Practice Founded on Diligence, Integrity, and Creativity**

Dunne Law PLLC is designed to stand in alliance with the honorable members of the Bar and maintain the three core values on which the firm was founded: Diligence, Integrity, and Creativity.

**Diligence** – Handling your case, I work until each layer is performed exceptionally. “Good enough” is not acceptable.

**Integrity** – Legal services are often billed by the hour. Dunne Law PLLC is here to help you and to further your interests, prioritizing a just and efficient resolution to your case. This means fair and honest billing, every time.

**Creativity** – As an artist at heart, I thrive when helping you see the legal world through a different lens. The law is complex, but when creatively viewed, we can find new ways to demonstrate how it supports your position. Applying research skills, medical knowledge, and litigation experience, I craft unique and tailored arguments to help others see things from your perspective.

*“I left an incredibly fulfilling career in nursing for litigation because I wanted to learn to care for people in a different way.”*
